

Board Public Advisor

Our Board Public Advisors are members of the public who help with the running of the ARC KSS and work with the Board (the group of people who have overall responsibility for the management and oversight of the organisation).

Their role is to make sure that ARC KSS:

- Spends its time and efforts on the research areas that were originally identified as needed and wanted by service providers and local populations (the objectives)
- Spends its money in an ethical (fair) and transparent way – making sure it's getting the best value for public money
- Honours its commitment to public involvement throughout its processes (involves the public and listens to the voice of the public in all the different stages of research, and the different research projects that are going on)

Our three current Board Public Advisors are:

[Michelle Gardener](#)

[Jason Grant](#)

[Eleanor Levy](#)
